Tech Lead & Software Architect

SUMMARY

I have 13 years' experience in the software development industry. My expertise extends from developing reliable solutions to the architecture, managing, planning, and helping clients meet their needs in terms of technical challenges.

EXPERIENCE

Backend Engineer | Freelance

Sept 2019

Technical lead | Sharing Group

Oct 2018, Mar 2019

- Plan and design the structure of a technology solution.
- Assist with solving technical problems when they arise.
- Ensure the implementation of agreed architecture and infrastructure.
- Monitor systems to ensure they meet both user needs and business goals.

Technical lead | Step Up Digital Solutions

Mar 2018, Sep 2018

- Mentor and motivate programmers to develop their technical skills + provide them with what they need to work efficiently and achieve quality (tools, pipelines, etc.).
- Evaluate the technical efficiency and make changes as necessary.
- Collaborate with Product Management to ensure that the features being developed, solve customer problems and fully meet customer expectations.
- Review modules code and ensure coding standards are followed.
- Enhance and comply with project coding standards and industry best practices.

Technical lead | Hub for Developing and Managing Electronic Networks

Aug 2017, Feb 2018

- Plan and design the structure of a technology solution.
- Ensure the implementation of agreed architecture and infrastructure.
- Review modules code and ensure coding standards are followed.

Software Project Manager | Starware Group

June 2015 – May 2017

- Responsible for the project success in terms of achieving all project phases with high quality, minimum cost, and within the project timeframe.
 - Identify Resources needed and assign individual responsibilities to carry out the project deliverables successfully with complete customer satisfaction.
 - Manage day-to-day operational aspects of a project and scope to ensure the company project management methodology on all project deliverables to be complete, verified, accurate, current, and stored appropriately.
 - Ensure effective communication with the stakeholders to identify needs and evaluate alternative business solutions.
